

## **Paradise Entertainment Exhibits at the Second China International Import Expo**

### **Macau High-tech Company Dedicated to Technology Innovation**

**Shanghai, 4 November 2019** – Paradise Entertainment Limited (“Paradise”) (HKEx Main Board listed company, stock code: 1180), through its subsidiary company Tech (Macau) Limited, participated in the second China International Import Expo (“CIIE” or the “Expo”) held in Shanghai. At the Expo, Paradise exhibited its 5th generation mobile networks (“5G”), Artificial Intelligence (“AI”) and other high-tech products for the first time giving an exhilarating impression to the exhibitors and attendees.

Paradise is a high-tech company based in Macau and has been committing to research and development in high-tech products’ innovation and continuously deploying its latest high-tech products to the market. Paradise has a strong pool of high-tech talents and has been investing increasingly on research and development in high-tech innovation areas of artificial intelligence and networking for the provision and reinforcement of innovation and technical support and services in new technologies such as 5G, AI and etc. In recent years, Paradise has perennially increased its investment on research and development for the attainments of innovation and breakthrough in design in the applications of smart wear, smart home and wireless terminal products with a view to providing customers’ needs with professional solutions on high-tech products.

The “Outline Development Plan for the Guangdong-Hong Kong-Macao Greater Bay Area” advocated the cultivation of 5G, mobile internet communication technology and related projects as major pillars of industry development. Consequentially, 5G has received a focus of the national industries’ attention. Paradise also captures this opportunity and has continuously been attracting high-tech talents on board as well as increased investment on research and development pursuant to the technology standards of 5G communication, aligning with AI design and cloud technology architectures for the development of high-tech

intelligence products applying in areas of sports and health, physical education, smart home, security monitoring and etc., ultimately for the pursuit of customers' quality smart life and services

**Mr. Jay Chun, Chairman and Managing Director of Paradise** commented, "We are very delighted to demonstrate our latest high-tech products at the second CIIE in Shanghai for the first time. The Expo provides a platform for reinforcing communication and cooperation with customers. As a local high-tech company in Macau, Paradise will follow the vision of high-tech development trend and continue our commitments on investing in high-tech research and development, continuously to strive for innovation and launching new high-tech products, in the manner as we did before, and contribute to high-tech development of the Country and the Guangdong-Hong Kong-Macau Greater Bay Area.
