LT Game Unveils “Black Coral” and Next-Gen Gaming Ecosystem at G2E Asia 2026 in Macau

Hong Kong/Macau, 12 May 2026 – Paradise Entertainment Limited (“Paradise Entertainment”, HKEx stock code: 1180; together with its subsidiaries collectively referred to as the “Group”), through its subsidiary LT Game Limited (“LT Game”), is pleased to announce its participation in G2E Asia 2026, held at the Cotai Expo within The Venetian Macao during 12 to 14 May 2026. Recognised as one of the world’s most prominent gaming industry events, the Global Gaming Expo (G2E) serves as a premier platform for showcasing innovation, fostering collaboration, and driving business opportunities across the global gaming sector. G2E Asia, in particular, has established Macau as Asia’s hub for connecting the gaming industry and driving business, bringing together casino operators, gaming equipment suppliers, regulators, investors, and media, etc. to explore the latest technologies and trends shaping the future of entertainment.

At this year’s exhibition, LT Game has unveiled “Black Coral”, its new Live Multi Game (LMG) platform. This new platform delivers a fully integrated live gaming environment, incorporating personal betting terminals, real-time trendboards, and dynamic visualization. By highlighting observable patterns derived from actual gameplay outcomes through intuitive visualisation, the system aims to enhance player engagement and the overall gaming experience and at the same time optimise floor efficiency and operational performance of casino operations. This modular and scalable solution demonstrates LT Game’s ability to combine cutting-edge automation with intuitive player interfaces, ensuring both operational reliability and a compelling entertainment experience.

Complementing Black Coral is the “Speedwave” cabinet series, purpose-built for its advanced LMG ecosystem. The display showcases an extensive lineup of LMG terminals powered by Black Coral, alongside dual-monitor configurations running flagship titles such as Mori Dice, Enter the Dragon, and

LT Game's multi-game platform HOP (House of Play). In addition, the new patented "SeeSaw" series of ETG (electronic table game) is featured, elevating personal Craps and dice gameplay through enhanced interactivity and next-level presentation. Together, Speedwave and the personal dice-rolling device SeeSaw highlight LT Game's commitment to gaming equipment hardware innovation, enhanced flexible configurations tailored to diverse casino environments, reflecting innovation in Macau's local design and enhancing player's enjoyable gaming experience.

LT Game also introduces "Nebula", its next-generation slot ecosystem, at the exhibition. The new system is designed to seamlessly connect players, casino operators, and game developers, creating a dynamic network that fosters collaboration and game content diversity. LT Game provides casino operators as well as game developers with a versatile ecosystem that supports rapid game content deployment, maximises floor and game efficiency and provision of convenient and flexible game updates, and enhances player's gaming experience and hence retention through connected experiences.

Another highlight at the exhibition is "Meta Paradise," a pioneering investment approach that enables innovative metaverse-based participation in the gaming industry. Meta Paradise represents a forward-looking model for progressive gaming experiences, offering new opportunities for investors to engage with the sector while supporting the development of cutting-edge technologies and content. This initiative underscores LT Game's vision of aligning capital investment with product innovation, creating a sustainable framework for growth that benefits both operators and other stakeholders.

The exhibition also features the "GameView" series, including the "GameView Horizon" LED wall animation display and multi-media system equipment, the "GameView Personal" terminal, and the "GameView Table" dynamic card display system for table games. These advanced digital multi-media display solutions deliver creative and vivid game animations, dynamic marketing content, and highly immersive visual gaming experiences. By integrating proven game mechanics with enhanced presentation and seamless system reliability, GameView demonstrates LT Game's ability to meet the expectations of casinos in raising their operational standards. LT Game also presents a dedicated ETG zone, the "GameView ETG Zone", which further illustrates LT Game's ability to merge entertainment

with operational efficiency, offering operators flexible display solutions that enhance both player immersion and marketing impact.

Together, all these innovations underscore LT Game's continued exploration of emerging technologies and alternative engagement models, designed to align with the evolving expectations of today's casino patrons and to provide operators with new avenues for customer engagement.

Dr. Jay Chun, Chairman and Managing Director of Paradise Entertainment, commented: "G2E Asia has always been an important platform for us to connect with our customers and industry partners. In 2026, LT Game is proud to present a comprehensive showcase that reflects our strengths in LMG systems, ETGs, slot innovation, and integrated gaming solutions. With Macau as our home base, we remain committed to high-tech investment, research and development, and delivering reliable, forward-looking products that support the long-term success of casino operators in a rapidly evolving gaming landscape. Paradise Entertainment will continue to leverage its strong market position, technical expertise, and close collaboration with operators to drive innovation locally and expand its presence internationally."

About Paradise Entertainment Limited
